D7632
Projection Server

Description

Participants can use this device to directly project the speech contents to the large screen in the conference room, or to project them after managed by the secretary terminal. The conference secretary can also choose other program sources to broadcast according to the requirements of the unit. A conference room supports multiple projection applicants to work at the same time, and users can configure it through the backend management interface.

Features

- Based on Linux development, using embedded design, with low power consumption and high efficiency, safe, stable and reliable.
- Support multiple user projection applications, up to 8 1920*1080P screens or 4 4K screens.
- Support paperless terminal lifting control.

Specifications

Shell Material	Aluminum alloy wire drawing panel for the chassis
Installation Method	Rack-mounted installation
Dustproof Function	Dustproof slot
Color	Black
Machine Dimensions	(W)190mm×(D)150 mm×(H)44mm
Power Supply	DC12V@1A input
Power	12W
Weight	About 1Kg
